

Point-of-Care Diagnostic Testing

Hospital-Grade Accuracy. Living Room Convenience.

At Whole Pediatrics Group, we believe that rapid, accurate answers lead to better care and peace of mind. We have invested in hospital-grade diagnostic technology that we bring directly to your home or provide in our Riverside office.

Whole Pediatrics Point-of-Care Testing Model

Transparency is Our Foundation

As a Direct Primary Care practice, we do not profit from laboratory testing. When you see a price listed below, you are paying our direct wholesale cost—**zero markup, zero hidden fees.**

Your membership fee pays for our expertise, time, and 24/7 availability. Advanced diagnostics are billed separately at our cost to ensure sustainable, high-quality care.

- Clinical Value: All tests are performed during your visit (office or home) with no facility fees or draw fees
- Wholesale Pricing: You pay what we pay for high-cost consumables like molecular tests
- Informed Consent: We will always discuss the cost of an advanced diagnostic test with you before it is performed
- Savings: Our tests cost significantly less than urgent care (\$250+) or ER visits (\$1,500+)

1. Respiratory Molecular Lab (ID NOW™)

We utilize Isothermal Nucleic Acid Amplification technology to detect viruses and bacteria at the molecular level. This is significantly more accurate than standard "rapid" tests used in most urgent care centers.

Test	Results Time	Accuracy	Price
Strep A (Molecular)	2–6 minutes	>97%	\$45
RSV (Molecular)	13 minutes	>97%	\$80

2. Immunofluorescent Screening (SOFIA® 2)

Using laser-fluorescence technology, we provide advanced screening for common seasonal illnesses.

Test	Results Time	Accuracy	Price
Strep A	10 minutes	~90%	\$30
Flu A & B	15 minutes	~85%	\$25
COVID-19	15 minutes	~85%	\$25

3. Wellness & Preventive Testing

Basic wellness tests are included in your membership. We prioritize non-invasive technology whenever possible to keep our "ouch-less" promise to our patients.

Test	Technology	Price
Newborn Jaundice Screening	BiliChek (non-invasive)	Included
Hemoglobin Screening (Ages 0-18)	HemoCue 801	Included
Urinalysis (Standard)	Dipstick analysis	Included

Important Notes:

- All diagnostic services are performed during your visit (office or home) with no facility fees or draw fees
- Prices reflect our direct wholesale cost with zero markup
- We will always discuss the cost of an advanced diagnostic test with you before it is performed
- Basic wellness tests (jaundice screening, hemoglobin screening, urinalysis) are included in your membership
- Advanced molecular diagnostics (Strep A, RSV) and immunofluorescent tests are billed separately at our wholesale cost
- Kit prices may fluctuate based on supplier costs—we pass through current wholesale pricing
